

F16.2

1. Measure
Radiance at p&s
polarizations
R_p and R_s at each
pixel

3. Model Compute emissivity from PER 2. Signal Process

Compute

PER=R_p/R_s

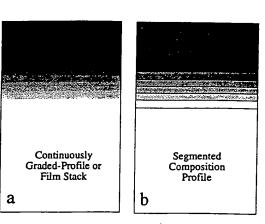

at each pixel

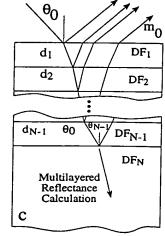

4. Calculate
Temperature
at each pixel from
radiance and
calculated emissivity

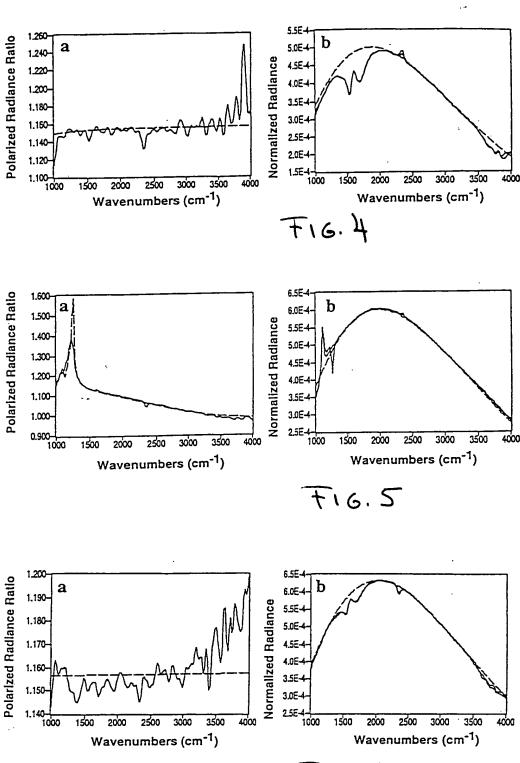

5. Construct Map
Display and export

F16.3

F16.6
